

Arena Cologne, Germany

Project Period: Oct 2012 - May 2013
Capacity: 8.000
Construction Costs: 35 Mio. €
Client: Kölner Sportstätten
Architect: vision4venue
Concept: vision4venue

Project description:

The existing monofunctional velodrome should be developed into a multifunctional indoor arena for events, concerts, shows and especially professional basketball according to BBL standards. It is designed to be as flexible and multifunctional as possible to create the maximum revenue for the operator. It includes five F&B outlets 20 hospitality boxes, three event boxes and a business area to accommodate 400 – 600 business guests.

vision4venue – Part of the Project:

Vision4venue is contracted to work out a technical, functional, architectonic feasibility study and an operational concept to compare the two possible options – re-build a new arena or transform the velodrome .
