

Stadium Roof Duhok, Irak

Project Period: since Feb 2013
Capacity: 25.000
Roof Area: 20.000 sqm
Construction Costs: 20 Mio. €
Client: City of Duhok
Architect: vision4venue

Project description:

The Stadium Roof was designed to be an iconic and modern facade and steel-roof structure covered by membrane and polycarbonate. The modular standalone roof represents the proud and independence of the kurdish community in Irak while it is illuminated in the traditional colors.

vision4venue – Part of the Project:

The team of vision4venue is responsible for the design and conception of the roof in cooperation with an partner from Netherlands. At a later stage it is planned, that vision4venue will be responsible with its partner for the turnkey execution of the project.
